

Technical Writer

Based in sunny San Diego, the XYO Network is the world's first Proof of Location blockchain project. The company behind XYO Network is XY Findables, which was started in 2012 and has produced over 1 million Bluetooth and GPS hardware devices, which help customers find and keep track of their prized possessions, like their keys, purse, and other things.

The lessons we've learned building a successful consumer IoT business has prepped us for the most exciting and ambitious chapter of our company's life: the XY Oracle Network ("XYO Network" or "XYO"). The world's first decentralized location oracle.

Check us out on CNBC, too! (<https://youtu.be/Boiai8tWnhM>)

Please visit <https://www.xyo.network> to learn more.

Are you passionate about technology and its implications for our future? Do you love sharing knowledge, growing your skills, and working with great people? The XYO Network team is growing, and we are looking for extraordinary talent who enjoys building as much as we do. So if you are self-directed, enjoy autonomy in your work, and you are an excellent participant in a team, come join XYO Network today!

Responsibilities:

As our first Technical Writer, you will create and update SDK, API, and other documentation to support our technical audiences. You will work closely with our engineers, developers, product managers, and other staff to create documentation, code samples, and references that are easy to consume. You will participate in team initiatives and help to create a set of established documentation practices and guidelines.

Qualifications:

- 5+ years of experience writing software documentation for a technical audience, particularly SDKs and API content.
- Technical experience with developer tools and platforms, including RESTful APIs, JSON, code commenting tools and source code repositories.
- Ability to review source code and document its function without direction. Currently, most software is written in JavaScript, Swift, and Kotlin.
- Ability to write technical content for developer and detail oriented audiences.
- Excellent verbal and written communication skills with a strong attention to detail.
- Ability to work with multiple teams throughout all stages of the software development cycle, from concept to final product release.

- Ability to learn complex concepts quickly and explain them clearly to technical and non-technical audiences.
- Basic understanding of web development- HTML, CSS, and JavaScript. If you are new to programming and do not have these skills, it will be required that you learn them within your first month of employment.

Extras

- Work with a ruggedly handsome group of blockchain nerds
- Plus, benefits and stuff
- Like, free Coke Zero

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status.

If the above looks good to you, please apply directly to careers@xyo.network.
